G O In modern world it's ^{im} impossible to imaging a good country without others. You can't produce everything in your country only, ~~and~~ but you also you don't suppose to.

Today we have such a good thing as globali-
zation. If you produce something more complective
than a shovel, you have to heatr it. That means,
for exsample, if you make a computer, you p buy
a ~~dis~~ screen from one factory, a proessor from another,
put them together and bam! You get a morden
computer.

wrong aspect
Some time, some countries don't
~~Some countries aren't care~~ an have an morefertile
soil or natural resources, so they supposed to exchange their
industrial products ~~ento~~ some wheat or gas. Thats how ~~works~~
merchants works. They ^{take} ~~give~~ that, what you have a lot, and
give you what you don't have. But now this bazaar has
same size as the Earth.

Countrgies trade not only food and fuel. They exchange
a cultural experience. ~~look~~ Listen closely and you
will hear some ~~no~~ words not from your
language.

So, the country can't call ~~g~~ itself as a country
withouth other countries, and you can't disagree
with it
